

RSU Oklahoma High School Programming Competition

Rogers State University's Department of Technology & Justice Studies is offering on-the-spot registration for the state level programming competition. There are three levels: high school competition, university competition and international competition. **No previous coding experience is required.**

Top teams from the high-school competition can advance to university and international competitions. Students will gain hands-on problem-solving, computational thinking and collaboration experience that builds a foundation for college and career success.

What We Are Offering:

Scan to Register →

- **On-the-Spot Registration:**
 - Students can sign up for the **State-Level Programming Competition on April 1, 2026.** This is a great opportunity for students to test their problem-solving skills and begin a path toward regional, national and international recognition.
- **Internationally recognized ICPC certificates:**
 - Participants and winners will receive internationally recognized certificates. Additionally, winners will receive trophies. **Students may also be featured in news coverage.**
- **Transportation expenses will be reimbursed.**
- **Breakfast and lunch will be provided.**

Why This Works for Your School:

Student Engagement	Extracurricular Growth	Zero Admin Work
We provide a streamlined, mobile-friendly registration process that teachers can complete in minutes.	These programs provide students with tangible achievements for college applications and resumes.	Our team manages the entire information and registration flow, requiring no additional work from school staff, coordinators or counselors.
